

Syracuse City Newsletter

July 2007

Mayor's Message

It looks as though the theater project behind Wal-Mart cleared the final hurdles and should be starting soon. We are excited to have such amenities in Syracuse for residents on the west side of northern Davis County that previously were available only in Layton. The theaters ought to bring additional businesses to the town center as well.

I encourage all of you to shop in Syracuse, because the retailers here deserve our support. Their success will ensure a vibrant town center with a wide variety of businesses that provide convenience and much needed services to our community.

UDOT should begin installation of the traffic light near Syracuse High in time to complete the project before school begins.

The City is almost finished installing the land drain line that will channel subterranean water from 1000 West to the Jensen Pond for secondary use. This project, along with other captured water, will result in about 1,000,000 gallons per week for reuse. This results in a tremendous cost savings for our City as well as a terrific use of a valuable resource.

The work is going well on the new municipal building. It cannot be completed soon enough. Our police and firemen are literally waiting in line to use desks.

I am pleased to report that the City Council is considering the addition of a grant writer position for Syracuse, which the former city manager eliminated. Hopefully, we can advertise this job as soon we approve the new budget. The City missed many opportunities for grant money over the last six months. Those who stay informed through this newsletters and public meetings are aware of the many projects in our community that would not have been possible without grants.

Thanks to all the staff and volunteers who made this year's Heritage Days a tremendous success.

The summer heat is on the way. Please remember to be water-wise and use this valuable resource carefully. Have a great summer!

~ Fred ~

Public Hearings

The Planning Commission will hold a public hearing on Tuesday, July 3, 2007, at 6:30 p.m. to consider the rezoning of land, located at approximately 700 South 2000 West, from an A-1 Agricultural to a C-2 Commercial zone.

All public hearings are held in City Hall at 1787 South 2000 West.

The Big Fix on Tour Mobile Spay/Neuter Clinic

Thursday, July 12, 2007

1726 Heritage lane

Syracuse Museum Parking Lot

8:00 a.m. until full

For more information on prices and pre-operative procedures, call 1-866-PETS FIX or log on to www.utahpets.org

Conserving Water Tip:

Don't run the hose while washing your car. Use a bucket of water and a quick hose rinse at the end.

New Traffic Signal Construction Begins

Ralph L. Wadsworth Construction Company will install a new traffic signal and intersection improvements at SR-108 (2000 West) and 700 South near the new Syracuse High School.

Anticipate traffic shifts mid July with a two-day closure on the east leg of 700 South during the second week in August and expect completion prior to the beginning of the 2007-2008 school year.

The Utah Department of Transportation is funding the project with cooperation from Syracuse City. Caldwell Richards Sorensen will provide Public Information Services and Construction Inspection.

Three ways to obtain up-to-date project information: Refer to City's web site at <http://www.syracuseut.com>, subscribe to e-mail notifications by sending an inquiry to signalinfo@crsengineers.com, or call the project hotline at (801)824-5220.

Community Center/Recreation

**Daily meals are served in the
Community Center at 12:30 p.m.
Mondays - Fridays (except holidays)
PLEASE JOIN US!!!!!!**

For a complete list of senior activities, call Tiffany Vigil at 614-9658

Healthy Pregnancy Classes

This FREE class is offered every fourth Saturday, 10 a.m.-Noon, at the Community Center, and registration is not required. For questions, please call Amy Ihrig at 773-2503.

Aerobics

Aerobics classes are now forming. For more information, call the community center at 614-9660

Youth Karate

Cost is \$30. For registration information, call Johnny Aranda, at 544-7037.

Syracuse Soccer

Registration ends July 21 for pre-K (going into Kindergarten Fall of 2008) thru 6th graders for Fall Soccer. Cost is \$35 for residents and \$50 for nonresidents, which includes a jersey, shorts, and socks. All leagues are co-ed. Pre-K/Kindergarteners play Wednesdays/Fridays, 1st/2nd graders play Tuesdays/Thursdays, 3rd/4th graders tentatively play Wednesdays/Fridays, and 5th/6th graders tentatively play Tuesdays/Thursdays. All practices/instructional leagues tentatively begin the week of August 13. For more information, contact the Recreation Department.

Golf

The City and Glen Eagle Golf Course are teaming up again to offer golf lessons for youth ages 8-17. All skill levels are welcome. Participants will learn the basic fundamentals, rules, and golf etiquette. Registration for Session 2 runs July 2-31 with lessons held August 6-8, 9 a.m.-noon. Cost is \$50 for residents.

Syracuse Storm Tackle Football

This program, part of the WFFL (Wasatch Front Football League), is for youth ages 7-15 (depending on weight). Registration ends July 21 and costs \$90, which includes a jersey. You must sign a rental agreement to use City football equipment. When registering, each player must have proof of a recent physical, insurance, and Syracuse residency (utility bill) as well as a copy of a birth certificate (we do not keep them on file). For more information, contact the Recreation Department at 614-9660.

Warning: Back Yard Pools Can Be a Fatal Attraction to Toddlers - Drowning Is a Leading Cause of Death to Children Under 5 Years of Age

WASHINGTON, D.C. - About 350 children under 5 years old drown in pools each year nationwide, and over half of these incidents occur from June-August. Among unintentional injuries, drowning is the second leading cause of death to this age group after motor vehicle accidents. Another 2,600 children are treated in hospital emergency rooms each year for near-drowning incidents, most involving residential pools. The U.S. Consumer Product Safety Commission (CPSC) wants to reduce these numbers this summer.

Many people assume that a drowning occurs at a residence with a pool only when families are outside or swimming. But, a common scenario is a young child leaving the house without a parent or caregiver realizing it. Children are drawn to water, not knowing the terrible danger pools can pose.

"Drowning happens quickly and silently, often without any splashing or screaming," said CPSC Chairman Ann Brown. "It can occur in just the couple of minutes it takes to answer the telephone."

The key to preventing these tragedies is having layers of protection. This includes placing barriers around your pool to prevent access, using pool alarms, closely supervising your children, and being prepared in case of an emergency. CPSC offers these tips as prevention:

- Install a fence or wall at least 4 feet high completely around the pool. Fence gates should be self-closing and self-latching, with the latch out of a small child's reach. (*Note: Syracuse City Ordinance requires such fences to be at least 6 feet high.*)
 - If your house forms one side of the barrier to the pool, protect doors leading from the house to the pool with alarms that sound when a door is opened.
 - Place a (motor-powered) barrier/cover over the water when the pool is not in use.
 - Keep rescue equipment by the pool and a phone poolside with emergency numbers posted. Knowing CPR can be a lifesaver.
 - For above-ground pools, secure/lock steps/ladders to the pool or remove them when the pool is not in use.
 - If a child is missing, always look in the pool first. Seconds count in preventing death or disability.
- Alarms are an added precaution. Under-water alarms generally perform better and

can be used in conjunction with pool covers. CPSC advises consumers to use remote alarm receivers so the alarm can be heard inside the house or other places away from the pool area. CPSC offers three free publications to help prevent child drowning: "Safety Barrier Guidelines for Pools," "How to Plan for the Unexpected," and "Guidelines for Entrapment Hazards: Making Pools and Spas Safer." Copies of these publications are available on CPSC's website or by writing to "Pool Safety," CPSC, Washington, D.C. 20207.

Courtesy of Consumer Product Safety Commission

Utah requires building permits for all pools deeper than 24." This permit allows the governing authority (Syracuse City) to come and validate that property owners addressed all required safety measures for swimming pools. For more information, contact the Building Department at 825-7235.

Fire Department

Summer Fireworks Safety

The 4th of July is a favorite time of year for people of all ages, and the Syracuse Fire Department urges you to celebrate our Country's independence with family and friends. We also urge you to be especially fire safe this year and mindful of drought conditions that exist in our area. Most summers, we are at high risk for wild fires. Please be careful around vegetation, particularly next to buildings and homes, and have extinguishing resources available in case of a fire.

The Syracuse Fire Department offers the following fireworks safety tips:

- Purchase your fireworks from a reliable source
- Always read and follow the label directions
- Have an adult present
- Only use fireworks outdoors and away from dry grass
- Always have water close by (a garden hose or bucket)
- Never experiment or make your own fireworks
- Light only one firework at a time
- Never re-light a "dud" (wait 10-15 minutes, then soak it in a bucket of water)
- Never give fireworks to small children
- Dispose fireworks properly by soaking them in water, then placing them in trash can
- Never throw or point fireworks at other people
- Never carry fireworks in your pocket
- Never shoot fireworks in glass containers
- When igniting, always wear eye protection and never have any part of your body over the firework
- Stay away from illegal explosives

Have a fire safe and wonderful
4th of July celebration!

Old Emigration Trail

Syracuse is gearing up to begin the Trail this month. Construction will last approximately 3-4 months, requiring the reduction of speeds to a 35mph limit through the project area. Please be mindful of workers and remember to be cautious and patient while driving through all construction areas.

City Services and Seasonal Employment has a Price Tag

Seasonal employment increases the number of City employees every year. During winter months, the City employs approximately 135-145. Once summer begins, those numbers jump to around 183 employees. From April 1 to October 1 of last year, Syracuse spent approximately \$118,000 in payroll expenses for seasonal and recreational employees alone. That cost will multiply this year with the increase in minimum wage from \$5.15 to \$7.25 over a two-year period. It is also proving to be very difficult to attract good employees with low unemployment rates, putting pressure on job wages. However, without the help of our seasonal and recreational staff, it would be impossible to maintain our parks, cemetery, and grounds, as well as provide our citizens (mostly youth) with quality recreational programs. During the summer, our expanded workforce includes umpires, little league officials, and mowing and maintenance laborers. The never-ending chore of mowing grass is by far the biggest task of all. It takes a lot of time, energy, and money for upkeep of City grounds, detention basins, trails, numerous park amenities, ball fields, equipment, and buildings.

The maintenance of the cemetery includes the tedious job of weeding around each headstone to create a respectful appearance. Seasonal employees are a valuable asset because they make it possible for all of us to enjoy a well-maintained City with a variety of recreational activities. Our goal every day is to ensure the ball fields and gyms are always in playing condition. Syracuse has a beautiful Community Center and an extensive trail system connecting to the Jensen Nature Park, which is a great urban fishery site. So the next time you visit there or ride a bike along the Old Immigrant trail or hit a three pointer in the Community Center gym, remember how much time and effort it took the hard working folks at the City to make it possible for you.

Code Enforcement

Planning a garage sale, holding an open house, or selling your car? **We wish you success but ask you not to advertise on power poles.**

Working on power poles can be a dangerous job. To ensure reliable service, line crews must climb up and down poles in all kinds of weather, day and night. The job is made even more hazardous when people use nails or heavy staples on power poles to attach signs and posters. This may seem harmless but can become a nightmare for line crews.

Line crews wear protective clothing and gloves to prevent electric shock. Sharp, protruding nails can tear this protective equipment, resulting in injury. They also have special boots and climbing hooks to allow them to get up the pole to inspect or make repairs to lines. If these hooks hit metal, they may be deflected causing the line crewmember to fall.

It is illegal to tape, nail, or in any manner attach yard/garage sale signs to any pole, stop sign, or other property owned by Syracuse City, which includes park strips. City employees will remove and dispose of illegally placed signs.

Also keep in mind that City and federal storm water laws prohibit intentionally and knowingly dumping dirt, rocks, bark, or any other substance in the street where the sediment will end up in storm water basins. Violators will receive a citation and/or a fine.

Syracuse City

SYRACUSE
U T A H

Annual Drinking Water Quality Report 2006

We are very pleased to provide you with this Annual Water Quality Report to keep you informed about the excellent water and services delivered to you over the past year. Our goal is and always has been, to provide a safe and dependable supply of drinking water.

Where Does My Water Come From?

The Weber Basin Water Conservancy District's (District) drinking water supply comes from the Weber River and from several creeks along the Wasatch Front. Groundwater, primarily from the Delta Aquifer, is used to supplement surface water sources.

How Do I Get My Drinking Water?

Although a portion of drinking water originates as groundwater and is extracted from deep wells, the majority of the drinking water supply begins as surface water from the headwaters of the Weber River. Water is directed into a canal by a diversion dam. The water then flows through this canal whereupon it enters two large aqueducts. Several creeks along the Wasatch Front can feed into this aqueduct. From there, water is transported to each District's water treatment plants. After complete treatment, water is delivered to cities or water improvement districts for final distribution to individual users.

What Is In My Drinking Water?

All sources of drinking water are subject to potential contamination by naturally-occurring or man-made constituents. Those constituents can be microbes, organic or inorganic chemicals, or radioactive materials. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate the water poses a health risk. You can obtain more information about contaminants and potential health effects by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immune-compromised persons, such as those with cancer and are undergoing chemotherapy, who have

undergone an organ transplant, who have HIV/AIDS or other immune-system disorders, and/or some elderly and infants, can be particularly at risk from infections. These people should seek advice from their health-care providers about drinking water. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

Microbial contaminants, such as viruses and bacteria, may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.

Inorganic contaminants, such as salts and metals, can be naturally occurring or result from urban storm-water runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.

Pesticides and herbicides may come from a variety of sources such as agriculture, urban storm-water runoff, and residential uses.

Organic chemical contaminants, including synthetic and volatile organic chemicals, are by-products of industrial processes and petroleum production but can also come from gas stations, urban storm-water runoff, and septic systems.

Radioactive contaminants can be naturally occurring or the result of oil and gas production and mining activities.

There are many connections to our water distribution system. When properly installed and maintained, the concerns are very minimal. However, unapproved and improper piping changes or connections can adversely affect not only the availability, but also the quality, of the water. A cross connection may let polluted water or even chemicals mingle into the water supply system when not properly protected. This not only compromises the water quality but can also affect your health.

So, what can we do? Do not make or allow improper connections at your homes. Even that unprotected garden hose lying in the puddle next to the driveway is a cross connection. The unprotected lawn sprinkler system after you fertilize or spray is also a cross connection. A cross connection at your home will affect you and your family first. If you would like to learn more about helping to protect the quality of our water, call us.

Water Quality Data Table

The table below lists all drinking water contaminants we detected during the calendar year of this report. The presence of contaminants in the water does not necessarily indicate the water poses a health risk. Unless otherwise noted, the data presented in this table is from testing done in the calendar year of the report. The EPA or State requires us to monitor for certain contaminants less than once per year because concentrations of these contaminants do not change frequently.

Radioactive Contaminants							
Contaminant (units)	MCLG	MCL	Your Water	Range	Sample Date	Violation	Typical Source
Alpha Emitters (pCi/L)	0	15	2.95	ND-2.95	2002-2006	N	Erosion of natural deposits

 Engineering Consultant.....CK Gygi LLC

Here Come the Titans

The police look forward to the opening of our new high school. They will be part of many new traditions. Sgt. Philip Rogich will be the resource officer for the high school and Detective James Nielson will be the resource officer for the junior high. The Police Department will provide officers at football and basketball games and "Friday Night Lights," help with traffic control, and assist with any other event as needed. Our officers help coach basketball, wrestling, and baseball and we are excited to be part of the Titan tradition!

2007 Municipal Elections

The 2007 Municipal Elections will be here before we know it. Three Council seats and two referendum issues will be on the General Election ballot. There have been some recent changes in State Election Law. The first major amendment changed the candidate filing period. Those wishing to declare their candidacy as a Syracuse City Council member must file between **July 1-16, 2007**, at the Syracuse City Office between 8 a.m. and 5 p.m. The candidate filing period was previously July 15 thru August 15, so this change shortens and accelerates that timeframe. Those wishing to declare their candidacy must meet the following qualifications:

- Be a United States citizen at the time of filing
- Be at least 18 years old
- Be a registered voter of Syracuse
- Be a resident of Syracuse or resident of a recently-annexed area for a period of twelve consecutive months immediately preceding the date of election.

Candidate Guides are available for pick up at City Hall for those wishing to obtain more information regarding the elected position of Council member in Syracuse City before declaring candidacy. After the candidate filing period deadline, we will publish a candidate list in the newsletter and Standard-Examiner and schedule a "meet the candidates" night.

Many citizens took advantage of the opportunity to cast their vote early in the last County election. Early voting will again be available from **August 28 to September 7, 2007**, at the City office from 8 a.m. to 5 p.m. A picture ID is required, and voter registration must be completed 30 days prior in order to vote early. Those not registered may visit the Davis County website at the following link: <http://www.daviscountyutah.gov/clerk/auditor/elections/registration.cfm> or call or visit the City office for a copy of the registration form.

Another amendment to the State Election Law changed the date for Primary Elections to **September 11**. A Primary Election will be held only if filings for each office exceed twice the number of candidates to be elected.

The City Recorder is currently working with the County Elections Office to make some changes to the polling locations. The proposal is to consolidate all the Syracuse City voting precincts into one district allowing all Syracuse voters to cast their ballots in one location—the

Syracuse Community Center. The goal is to ease confusion on election day, simplify the election process, and create a sense of community. Poll workers are needed for the Primary and General Elections. If interested, please contact the City Recorder or visit City Hall for an application.

Direct your questions regarding any aspect of Municipal elections to the City Recorder, Cassie Brown, at 614-9633, or e-mail cbrown@syracuseut.com.

LET YOUR VOICE BE HEARD – VOTE!!

Utilities

Syracuse charges for utilities from the first to the end of each month with payments due on the 25th of the following month. Payments made after that are credited to the applicable accounts but cannot be reflected on the upcoming bills, which are printed the following business day after the 25th.

Water Meters

Syracuse City Ordinance requires property owners to keep meter lids accessible at all times. The meter lid is the outside access to shut off water to a home in case of a major leak.

Homeowners must keep dirt, grass, sod, rocks, and other materials from meter lids to allow easy access and better facilitate meter readings.

Police Department

Many people drive to Wyoming to purchase fireworks for the 4th and 24th of July celebrations. As you know, those fireworks are illegal. If it explodes or shoots up in the air, it is illegal. A simple rule is: if it is sold in Utah, it is legal.

Here is a list of reasons not to shoot off illegal fireworks:

- You could blow off a body part
- You could burn a body part
- You could light your neighbor's house on fire
- You could light your house on fire
- You could lose your money's worth if the police confiscate your illegal fireworks
- You scare the pets in the neighborhood
- You litter the neighborhood
- You could get a \$200 ticket from the police

Car Show

Founder's Park
(1500 South 1900 West)

Registration runs from 8:00-11:00 a.m.

Show is open 10:00 a.m.-5:30 p.m.

Awards given at 4:00 p.m.

Come enjoy the food, drinks, music, and—most of all—the cars!

Miss Syracuse and Miss Syracuse Outstanding Teen Pageant

The Miss Syracuse and Miss Syracuse Outstanding Teen Pageants were held June 16, 2007, at Davis High School. The theme was "What a Feeling!" We want to congratulate each young woman who participated and hope their experience will remain a great feeling throughout their lives. The new royalty for Miss Syracuse Outstanding Teen 2007 is Shawnee Haycock with her 1st Attendant Jackie Stuart and 2nd Attendant Bailey Johnson. The Spirit of Syracuse award went to Emily Busby. Crowned Miss Syracuse 2007 was Julie Yamane with her 1st Attendant Christine Poulson and 2nd Attendant Shaila Seegmiller, who also earned the Heart of Syracuse award. We appreciate all their hard work and their participation during Heritage Days.

Also, a warm thank you to those who supported the Miss Syracuse Scholarship

Pageant with generous donations, attendance at the pageants, and visiting the Heritage Days royalty booth. The success of the scholarship program is solely based on the support of the community. Thanks again!

A big thank you to all pageant committee members as well. It was a huge success!!
